

EVF proposes to develop Ultra small electric vehicle

EVF proposes to develop ultra small electric vehicle(EV)

1) Ultra small EV has unique advantages

- No exhaust emission
- Silent driving
- Charged both at home & destination
- Low running cost
- Easy handling, small turning radius
- Enough space for 4 adults
- Flexibility of design variation

2) Various scenes of Ultra small EV work

- Easy handling mobility gear for aged people in country area
- Human friendly, clear and safe mobility at sight seeing spot
- Ultra small taxi for Asian country (Auto rickshaw, Tricycle etc.)

3) Simple way of Ultra small EV production

- High quality, low cost platform
- Various upper body market by market

4) Plentiful variation of upper body design ideas
